COPYRIGHTED 1890.

Important to Purchasers.

Half pounds supplied at pound rates ; half bushel at bushels rates. Market Gardeners and Farmers requiring larger quantities of seeds than are here offered are invited to ask for special prices.

LIBERAL DISCOUNT.—To those who buy seeds in packets, I will allow 25 cents on each dollar sent me. Thus purchasers remitting \$1.00 may select seeds (in packets only) to the amount of \$1.25; those remitting \$2.00 to the amount of \$2.50 and so on.

CHEAP FREIGHT.—Freight rates from Milwaukee to all parts of the United States are very low. Customers at a distance requiring large quantities of seeds should order early that they can be sent that way, being cheaper than by express. Small orders however can often be sent as cheap by express.

SEEDS BY MAIL.—All seeds in packets, ounces and quarter pounds will be sent postpaid by mail at prices quoted, on parcels containing more than a quarter pound postage must be added at the rate of 8 cents per pound, on Beans and Peas 8 cents per pint and 15 cents per quart, and on Corn 6 cents per pint and 10 cents per quart.

MY PRICES.—It is my constant aim to make highest quality a first consideration and then to make my prices as low as good reliable seed can be sold. My prices therefore, will be found as low as those of any other reliable house for Seeds of the highest standard of excellence.

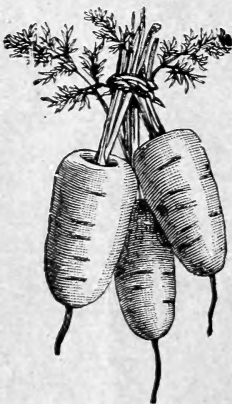

REMITTANCES.—Cash should always accompany the order. I will be responsible for money sent to me by Money Order, Bank Draft, Express or Registered Letter. Every Postmaster is required to register any letter on payment of eight cents extra postage. The cost of remitting may in all cases be deducted from the amount sent. Fractional parts of a dollar may be sent in one and two cent postage stamps.

Being possessed of facilities to have my seeds grown by only the best American and European growers, each item in a climate and soil best suited to bring it to the highest perfection, I solicit your orders, confident of giving perfect satisfaction.

CABBAGE.

There is nothing the gardener raises that requires a more careful selection of seed for a profitable crop than the cabbage. The seed must not only be of good germinating quality, but must be true to name, of uniform type, grown from perfect solid heads, and in a climate especially adapted to its perfect maturity. Such seed we offer our patrons with the utmost confidence that it will give the highest satisfaction in every respect. We exercise the greatest care in selecting our supplies, obtaining them from growers who make it a specialty, whom we know to be thoroughly reliable. We handle no cheap imported seed, or those of doubtful quality.

PRIDE OF THE NORTH.

RED COB ENSILAGE CORN.

This new and superior ensilage corn we can recommend as being the **HEAVIEST CROPPING** variety in cultivation, producing from fifty to seventy-five tons per acre. It has been thoroughly tested in all dairy sections of the country with best results. It is a pure white Dent corn of large size and handsome appearance, growing on a red cob. The fodder is sweet, tender, juicy, and said to contain more nourishment than any other variety. It grows thirteen to fourteen feet in height, taking strong hold in the ground, standing up well and resisting storms of all kinds to a remarkable degree. Peck 30 cts.; bushel \$1.00.

EVERGREEN FODDER CORN.

Profitable as green feed for milch cows, being sweeter and more nutritious and eaten more readily than fodder from field corn. Peck 45 cts.; bushel \$1.50.

Race Horse or Clydesdale. A heavy cropper, two weeks earlier than most sorts, grain plump. Peck 30 cts.; bushel \$1.00.

American Beauty Oats. This new oat was obtained by a continued selection for several years, by O. H. Alexander, of Vermont, of a new variety sent him from Moscow, in Russia. He writes: "It is one of the heaviest croppers known, having yielded eighty-two bushels per acre here in Vermont, when the average yield of other good varieties was fifty-two bushels, and I find, after testing over twenty varieties in the past few years, the straw is far more valuable for foddering purposes than any that I know of." This variety was also tested at the Experimental Station, Geneva, N. Y., the report being as follows: "Alexander's No. 2, (American Beauty) Oats, being long and taper-pointed; average height, three feet three inches; culm very erect and stout, leaves often exceeding sixteen inches in length, average length of panicle, nine inches; berry, large. This variety has already become very popular and is one of the most prolific varieties known." Peck 50 cts.; bushel \$1.50; 10 bushels and over \$1.35 per bushel.

FIELD PEAS.

Grass Mixtures for Hay and Permanent Pastures.

All authorities agree that for *Pasture or Hay*, best results are obtained from the use of *grass seeds in mixtures*. The reasons are obvious.

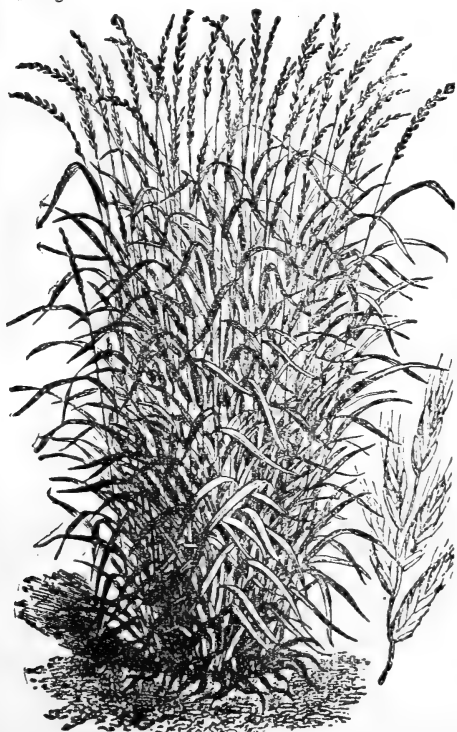

FIRST.—A number of varieties will insure a *much denser growth* than the same amount of seed of one or two varieties, and prove *less exhausting* to the soil, since they live to a large extent on different constituents.

SECOND.—Seasons that effect some grasses adversely are favorable to other sorts, so that with mixtures a failure is *practically impossible*, provided of course, the seed is good. We take great pains in selecting grass seeds in order to secure the *highest germination*, and mixtures are based on a full appreciation of the requirements of different soils for which they are intended.

Marguerite Carnations. This new race of Carnations has created quite a sensation among florists on both sides of the Atlantic, not only on account of their beautiful flowers of all colors, and the remarkable percentage that come "doubles," but also from the fact that, unlike all others, *they bloom in about four months from the time of sowing the seed*, and continue to flower until checked by frost. The most beautiful fragrant double Carnations can now be had in full flower in the open garden as easily and almost as quickly as the Chinese Pinks! Also for flowering in the house this new strain will be invaluable. Fully eighty per cent. of the flowers come double; of large size. They embrace a fine range of brilliant colors. The plants are dwarf, branching well upright without any support. They are very *free-flowering* and certainly a novelty of unusual merit.....10c.

A WILD FLOWER GARDEN.

Any one who has planted and cultivated flowers in neatly laid out beds, or carefully planned borders, is aware of the amount of labor and constant attention necessary to produce the desired effect. To those who cannot give this care the "Wild Garden" presents a substitute, which for its unusual and varied effects, for cheapness and the small amount of labor necessary for its construction, has no equal. "Wild-Garden Seeds" are a mixture of a large class of flowers, producing blooms of something new almost every day. Per pkt. 10 cts.; ½ oz. 20 cts.; oz. 35 cts.

SUMMER FLOWERING BULBS.

The cultivation of flowers from Bulbs and Dormant Roots commends itself to the amateur as being simpler than culture from seed and as being more sure in its results. They soon make a gorgeous display, flower the first summer and bloom and multiply season after season.

Dahlias. Best improved varieties, named colors; white, red, yellow and purple, each 20 cts.; doz. \$2.00.

Gladioli. This charming flower is coming more and more into use as its great improvement gets more universally known.

Kartoffel.

Early Sunrise. Sehr werthvolle frühe Sorte, Knollen von gleichmäßiger Form, Fleisch fest und schön geardet, Pck 35c, Bushel \$1.25, Vbl. \$3.25.

Das Signal. Die beste frühe Kartoffel, welche je eingeführt ward. Regelmäßig von Form, Haut von schöner heller Fleischfarbe, glatt im Aeußeren, sehr hübsch und klar was ihr ein schönes zartes Aussehen verleiht, sehr früh, von wunderbar kräftigem Wachstum und von vorzüglicher Qualität. Ihr auffallendster Character ist ihr kräftiges Wachstum. Bezüglich des Ertrages, glaube ich nicht, daß sie von einer anderen so frühen Sorte übertroffen wird. Pck 50c, Bushel \$1.50, Vbl. \$3.75.

Pearl of Savoy. Eine vorzügliche frühe Art, Knollen länglich glatt und gut geformt. Pck 35c, Bushel \$1.25, Vbl. \$3.25.

Rural New Yorker No. 2. Diese, die beste mittlere Sorte und Kartoffel für die Haupternte stammt aus den Versuchsfeldern des Rural New Yorker, wo mehr als 500 Arten praktisch geprüft wurden während der letzten 12 Jahre. Sie ist von höchst besondern Aussehen und kann leicht unterschieden werden unter hundert anderen Arten. Sehr groß und ungewöhnlich glatt mit wenigen flachen Augen: von Form länglich, dem Hundlichen zuneigend, und weißem Fleisch, von sehr schöner Beschaffenheit. Das Kraut ist sehr stark und der Ertrag an hübschen Knollen von großer Gleichförmigkeit der Größe ist ungewöhnlich reich. Pck 50c, Bushel \$1.60, Vbl. \$4.00.

Iron Glad. Eine späte Sorte, sehr ertragreich und von ausgezeichneter Haltbarkeit. Pck 35c, Bushel \$1.25, Vbl. \$3.25.

Red Cob Ensilage Korn. Diese neue und hochgeschätzte Art kann empfohlen werden als das am reichlichsten ergiebige Ensilage-Korn in Cultur, 50 bis 75 Tons per Ader ergebend. Es ist gründlich geprüft worden in allen Milcherei-Gegenden des Landes mit den besten Erfolgen. Es

ist ein rein weißes Zahn-Korn von bedeutenden Größe und hübschem Aussehen, an einem rothen Kolben wachsend. Das Futter ist süß, zart, saftig und soll mehr Nährwerth enthalten, als irgend eine andere Art. Es wächst 13 bis 14 Fuß hoch, nimmt festen halt im Boden, steht gut aufrecht und leistet Stürmen aller Art Widerstand in bemerkenswerthem Grade. Peck 30c, Bushel \$1.00.

Evergreen Fodder. Vertheilhaft als Grün-Futter für Milch-Kühe, da es süßer und nahrhafter ist und lieber gefressen wird, als Futter von Feld-Korn. Peck 45c, Bushel \$1.50.

Italienisches Raigras.

Italienisches Raigras. (Italian Rye Grass.) Ein prächtiges Futter. Pfd 10c, Bushel \$1.35.

American Beauty Hafer. Dieser neue Hafer war erzielt durch eine mehre Jahre hindurch fortgesetzte Auswahl durch D. H. Alexander in Vermont von einer neuen ihm aus Moskau in Rußland eingesandten Art. Er schreibt: „Es ist eine der reichlichst tragenden Ernte-Früchte, welche 82 Bushel per Ader in Vermont ergeben hat, während der Durchschnitts-Ertrag anderer guten Sorten nur 52 Bushel betrug, und ich finde, nachdem ich über 20 Arten in den letzten paar Jahren versucht habe, daß das Stroh bei weitem werthvoller für Fütterungszwecke ist, als irgend eine mir bekannte Sorte.“ Dieser Hafer ward auch geprüft an der Versuchstation zu Geneva, N. Y., deren Bericht folgendermaßen lautet: „Alexander's No. 2, [American Beauty] Hafer hat eine lang und spitzig zulaufende durchschnittshöhe von drei Fuß drei Zoll; Halm sehr gerade und stark, Blätter oft über 16 Zoll lang, Durchschnittslänge der Aehren 9 Zoll, Körner groß. Diese Sorte ist bereits sehr beliebt geworden und ist eine der einträglichsten bekannten Arten.“ Pect 50c, Bushel \$1.50, 10 Bushel und darüber \$1.35 per Bushel.

Ägyptischer. Ein hübscher weißer Hafer, welche viele ausgezeichnete Eigenschaften besitzt, sehr reichtragend. Pect 25c, Bushel 90c.

Dauerwiesen und Dauerweiden.

Alle Autoritäten stimmen darin überein, daß für **Weide** und **Heu** die besten ergebnisse erzielt werden durch den Gebrauch von **Gras-Sämereien im Gemenge**. Die Ursachen sind handgreiflich: Erstens;—Eine Anzahl von Arten sichert ein **viel dichteres Wachstum**, als die gleiche Menge Samen von nur einer oder zwei Sorten, und erweist sich als **weniger auslaufend** für den Boden, zumal sie größtentheils von verschiedenen Bestandtheilen leben. Zweitens;—Jahreszeiten, welche manchen Gräsern ungünstig sind, sind für anderen Arten günstig, so daß bei Gemengen ein **Fehl-schlag thatsächlich unmöglich** ist, vorausgesetzt natürlich, daß der Samen gut ist. Wir tragen große Sorgfalt bei der Auswahl von **Gras-Sämereien**, um die höchste **Keimkraft** zu sichern, und die Gemenge beruhen auf einer vollsten würdigung der Erfordernisse der verschiedenen Boden-Arten für welche sie bestimmt sind.

Für Dauerwiesen:

Auf trockenem Boden. Wiesenrispengras, Englisches Raigras, Italienisches Raigras, Knaulgras und Rother Klee. Bushel 15 Pfund \$2.00, 100 Pfund \$12.50.

GARDEN TOOLS.

The "Planet Jr." Combined Drill, Wheel Hoe, Wheel Cultivator and Wheel Plow.

The "Planet Jr." Combined Drill, Wheel Cultivator & Wheel Plow.

This most popular tool is unrivalled in beauty of design, perfection of finish, convenience and capacity of work. As a drill, it is exactly similar and equal to the No. 2, except in size. It holds one quart. As a plow, it opens furrows, covers them, hills, plows to and from, etc. As a hoe, it works safely and closely to and from both sides of the row at once, when plants are small, between rows as plants grow larger, working all rows from eight to sixteen inches wide at one passage. Price \$8.75.

The "Planet Jr." No. 2 Seed Drill.

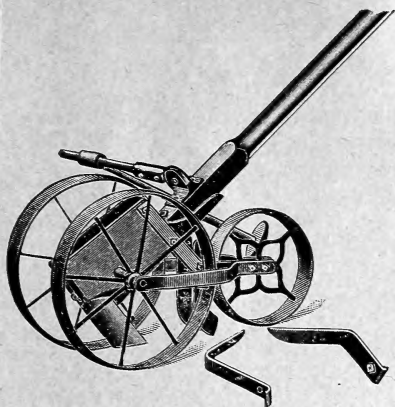

Holds 2½ quarts. It will sow with equal ease and accuracy, a single ounce of seed, or a full hopper covering evenly at any exact depth, and will roll down and mark the next row perfectly, all at a single passage. It has no cams, levers, brushes, cogs, springs or shapers. It is noiseless, automatic, self-cleaning and always reliable. Price \$7.00

The "Planet Jr." Double-Wheel Hoe, Rake, Cultivator and Plow Combined.

Has the invaluable feature of tending both sides of the row at once. The wheels can be set four, seven or ten inches apart. It has a pair of hoes, a pair of plows, two pair of cultivator teeth, a pair of rakes and a pair of leaf lifters, making it capable of every variety of gardeners work. Price \$6.50.

The "Planet Jr." Single-Wheel Hoe, Cultivator, Rake and Plow Combined.

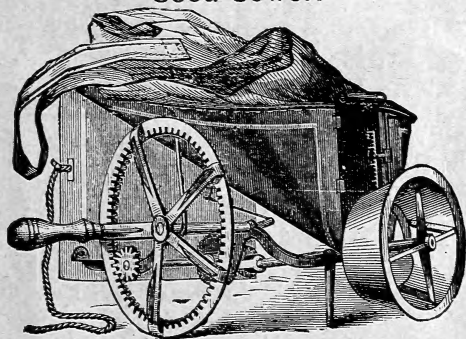

This tool is considerably lighter than the Double-Wheel, and is supplied with one pair of hoes, three reversible cultivator teeth, two narrow and one broad, a large garden plow and a pair of rakes. It is capable of a great variety of combination and is admirably adapted to the use of small gardens. Price \$5.00.

Greenleaf Garden Seed Drill.

Greenleaf Garden Seed Drill. This drill is simple, durable and strongly built. It has a force feed which makes it unequalled for sowing beet seed or any kind of seed that is hard to sow. One of the advantages of this drill is the plow that cuts a narrow trench, less than a half inch wide, at any depth required, so that the seed is sown in a narrow, straight line in the moist soil which makes it grow quickly. It has a cut-off, so that the flow of seed can be stopped at any time while in motion, which prevents any waste of seed at the end of the rows. A pair of weeder go along with each drill which can be attached in three different positions. Price complete \$6.00.

Cahoon's Broadcast Hand Seed Sower.

This Broadcast Sower is the best one of its kind in our market. The grain is held in a light sheet iron hopper, surmounted by a bag which will hold half a bushel of seed. The seed is thrown from eight to twenty feet on each side of the operator, the heaviest seed being, of course, thrown to the greatest distance. With this machine, at a common walking gait, you can sow from three to four acres per hour.

Circular sent with each machine.
